

News release**Flybe to go on Sale Tuesday, March 22nd; Airline selects Belfast City Airport as its Second Base**

Flybe Ltd is set to go on sale next week with a full list of routes, destinations, and everyday low fares due to be announced for its first two bases of operation at Birmingham and Belfast City Airport.

Having announced Birmingham as the home of its new headquarters and first crew base in November, Flybe is pleased to announce it will also be adding Belfast City Airport to its network—as its second main base of operations with plans to rapidly grow, create more jobs, and add more flights as the summer progresses.

Flybe CEO, Dave Pflieger, said: “Next week is going to be an exciting time for customers and communities that have been waiting to hear from us about low fares, new routes, and new destinations—all of which are being timed to coincide with the restart of the economy and a return to normalcy after two difficult years for all.

“As you’ve heard, our team has been working hard for over a year and a half to bring customers a new airline that people will love, and we are particularly excited to be flying to Belfast City Airport and serving Northern Ireland.

“Once we start flying from Birmingham, Belfast, and many other cities in the UK and EU, we are confident that a new and improved Flybe will provide customers with great value, more choices, and the opportunity to quickly and more conveniently visit loved ones, go on holiday, and more easily visit customers or attend important meetings.

“Given that goal, Flybe hopes to do its part to help communities across the country bounce back from the dramatic impact of the global pandemic.”
